Enthusiastic Product Designer looking for interesting problems to tackle. I've worked in two fortune 500 innovation labs and spent 6 months in the Czech Republic on an international work assignment.

Work Experience

LEAD DESIGNER

Lifion by ADP

September 2019 - Present

In this role I lead the worker lifecycle experience which enables Human Resource Practitioners to hire, transfer, promote, and terminate employees through our platform. I do end-to-end UX design and strategy including early stage concept testing, iterative design, and usability testing to ensure a great experience.

DESIGN EVANGELIST

Honeywell - Brno, Czech Republic

October 2018 - April 2019

In this role, I challenged myself by creating a position and traveling abroad to the Czech Republic for 6 months. I worked in our Brno Software Engineering Hub and taught engineers user experience design fundamentals and acted as a local design resource for them.

PRODUCT DESIGNER

Sentience™ by Honeywell

October 2017 - September 2018

In this role, I worked on multiple Industrial Internet of Things applications with an agile, cross-functional team of Product Managers, Software Engineers, and UX designers. I created personas, journey maps, and conducted design sprint workshops to get these projects off the ground.

UX DESIGNER

Honeywell

May 2015 - September 2017

In this role, I Worked on the Digital Employee Experience, Honeywell's Intranet supporting 100,000+ employees. I conducted global user research with many of our campuses and hubs. I also supported internal businesses and domains to design and build their employee web pages.
