Enthusiastic product designer currently working on IoT technologies at Honeywell and living abroad in the Czech Repbulic. Experienced design lead that enjoys working closely with engineers and product managers on innovative experiences.

Work Experience

LEAD DESIGNER

Honeywell - Brno, Czech Republic

October 2018 - Present

Currently working on IoT technologies and evangelizing design best practices in Honeywell's Brno Technology Hub.

PRODUCT DESIGNER

Honeywell Sentience™

October 2016 - September 2018

Honeywell Sentience is Honeywell's IoT suite designed and developed to simplift the Internet of Things in all of Honeywell's four business units.

In this role, I worked with an agile, cross-functional team of Product Managers, Software Engineers, and UX Designers. I delivered user flows, wireframes, prototypes, and visual designs for the Honeywell Sentience™ IoT, Data, & Analytics experiences

UX DESIGNER

Honeywell

May 2015 - September 2016

In this role, I worked with multiple principle designers and agencies on Honeywell's Digital Workplace, our company wide intranet used by 100,000 + users. We conducted global user research and usability testing in 3 global regions: APAC, EMEA, and North America.

Education

INFORMATION TECHNOLOGY AND ENTREPRENEURSHIP

Rutgers University / New Brunswick, New Jersey
